PASINI

ITALIAN LUXURY HANDLES

MADE IN ITALY SINCE 1967

PASINI
ITALIAN LUXURY HANDLES

Da oltre 50 anni la nostra famiglia lavora nel settore dell'ottone, creando con amore e passione maniglie e accessori distribuiti in tutto il mondo. Siamo felici oggi di presentare il nostro nuovo catalogo generale, frutto del lavoro e della visione che in tutti questi anni hanno portato a far conoscere il brand Pasini come un riferimento di qualità, creatività e innovazione. L'unicità dei nostri prodotti, sta nella cura artigianale con la quale vengono creati, nella tradizione e nelle attitudini positive del vero Made in Italy. La collaborazione con istituti di ricerca, università di architettura e designer internazionali, ci permette invece di essere innovativi nella ricerca di materiali e nei brevetti di nuove soluzioni tecnologiche, che possano certificare l'eccellenza dei nostri prodotti. Un grazie particolare pertanto, a tutti i nostri collaboratori che credono e sostengono il nostro progetto ed a tutte le persone che si apprestano a sfogliare questo catalogo. Oggi ci presentiamo con una gamma di maniglie, maniglioni e accessori tra le più complete a livello internazionale, per esprimere al meglio il lavoro che da due generazioni siamo orgogliosi di offrirvi.

made in Italy

For over 50 years our family has been working in the brass sector, creating with love and passion handles and accessories distributed all over the world. We are proud today to present you our new general catalogue, the result of a work and vision that in all these years has led to make the Pasini brand known as a reference for quality, creativity and innovation. The uniqueness of our products, is in the artisanal care with which they are created, in the tradition and positive attitudes of the true Made in Italy. Collaboration with research institutes, universities of international architecture and designers, allows us to be innovative in materials research and patents new technological solutions, that can certify the excellence of our products. A special thanks therefore to all our collaborators who believe and support our project and to all the people that will browse this catalog. Today we introduce ourselves with a range of handles, pull handles and accessories among the most complete at international level, to best express the work that for two generations we are proud to offer you.

PASINI
ITALIAN LUXURY HANDLES

Il Made in Italy è per noi autentico riflesso della cultura italiana, delle tradizioni e delle attitudini positive che ci accompagnano nella vita di tutti i giorni. È molto più, quindi, di una semplice certificazione di qualità. Ciò è evidente nel rapporto umano e di amicizia che instauriamo con i nostri Clienti e nella nostra continua ricerca del bello, anche nelle piccole cose. Le nostre maniglie personalizzate sono da anni portavoce del design italiano, grazie alle loro eccellenti particolarità:

- materie prime utilizzate di altissima qualità;
- dettagli realizzati con cura e attenzione;
- lavorazione accurata in tutte le fasi;
- alto livello di artigianalità;
- massima sostenibilità ambientale nel processo di produzione.

since
100% made in Italy **1967**

For us, Made in Italy is the most authentic reflection of the Italian culture and the positive attitudes that we always carry with us and effect our every day life. It is more than just a quality certificate. This is evident in the humans relationships and friendships we establish with our clients and in our constant search for beauty even in every details. Our door handles and accessories for doors and windows has been for years spokespersons of the Italian Design:

- highest quality raw materials;
- great attention to the development of the details of our products;
- great attention to all stages of product processing;
- high level of craftsmanship;
- maximum environmental sustainability in the production process.

PIERGIACOMO PASINI
Planning and Production Manager.

FLORIDO PASINI
Fondatore e Presidente onorario.

ICARO PASINI
General Manager.

Creare è la nostra filosofia, Serietà
è la nostra priorità, Dinamismo
è la nostra forza. Distinguersi, è
l'opportunità che vi diamo...

Creating is our philosophy, Seriousness is our
priority, Dynamism is our strength.
Stand out, is the opportunity we give you...

highlights

1967 OFFICINA SIDERURGICA

PFS, Pasini Fratelli Sabbio. Pasini nasce nel 1967 grazie ai fondatori, i fratelli Giuseppe e Florido. Nati come artigiani, fondarono un laboratorio di fusione metalli.

1974 FONDERIA

La fusione e lo stampaggio della barra di ottone forgiata a caldo, iniziate nel 1974, sono attività del processo produttivo altamente monitorate.

1980 ESPANSIONE IN EUROPA

Germania e paesi scandinavi sono i primi avamposti fuori dall'Italia conquistati dai fratelli Pasini, inizia l'espansione verso nuove frontiere.

1995 CREAZIONE PRIMI MODELLI CLASSICI LYBRA E DIANDRA

Inizia la collaborazione con il designer Angelo Dolcetti con la creazione dei primi modelli classici Lybra e Diandra.

1997 PASINI METALS PRODUCTIONS SRL

Nasce la Pasini Metals Productions srl, la seconda generazione entra ufficialmente a guidare l'azienda.

2007 COLLABORAZIONE CON L'UNIVERSITÀ DEL DESIGN POLITECNICO DI MILANO

2007 COMPASSO D'ORO

La maniglia Plus è finalista del concorso Compasso d'oro.

2012 ATTENZIONE ECOLOGICA

Nel 2012 è stato installato un impianto fotovoltaico che soddisfa una buona fetta del fabbisogno della produzione di Pasini.

2014 BEST PRODUCT AL BELARUS DESIGN AWARD

La maniglia di design Milano vince il premio di Best Product al Belarus Design Award.

2016 MANIGLIE E MANIGLIONI CUSTOM MADE PER FORNITURA AL PALAZZO PRESIDENZIALE DI ABU DHABI

2020 RICERCA SU MATERIALI ANTIBATTERICI

1967: PASINI CAME TO BEING AS SIDERURGICAL WORKSHOP

PFS, Pasini Fratelli Sabbio, came to being in 1967 as a fruit of its founders brothers Giuseppe and Florido. Originally craftsmen in the field of metal polishing, they managed to organize and launch on the market an original and very competitive production of handles.

1974: THE FOUNDRY

The fusion and the stamping of the heat forged brass are closely monitored activities that make up the production process.

1980: EUROPE EXPANSION

Germany and Scandinavian countries are the first areas out of the Italian borders where Pasini starts its distribution, here starts the expansion.

1995: CREATIONS OF THE FIRST CLASSICAL MODEL OF LYBRA AND DIANDRA

Starts the collaboration with the designer Angelo Dolcetti with the creation of the first models of the Classique Line: Lybra and Diandra.

1997: PASINI METALS PRODUCTIONS SRL

Date of birth of Pasini Metals Productions s.r.l., the second generation takes over the family business.

2007: COLLABORATION WITH UNIVERSITY OF MILAN

2007: COMPASSO D'ORO

The handle Plus, is finalist at the Compasso d'oro award.

2012: RESPECT FOR THE ENVIRONMENT

In 2012 is been installed a photovoltaic system that satisfy a good part of Pasini needs.

2014: BEST PRODUCT AL BELARUS DESIGN AWARD

The door handle Milano of the i-Design line, wins the price as Best Product at the Belarus Design Award.

2016 CUSTOM MADE HANDLES AND PULL HANDLES FOR ABU DHABI PRESIDENTIAL PALACE

2020 ANTIBACTERIAL MATERIALS RESEARCH

1974 Fonderia

1967 Officina Siderurgica

2012 Impianto Fotovoltaico

Le nostre maniglie e maniglioni sono da anni portavoce del design italiano. La costante ricerca del bello che caratterizza il nostro processo produttivo rende i prodotti Pasini un autentico riflesso della cultura italiana.

Our elegant door handles and pull handles represent the italian design all over the world. The constant search for beauty and perfection that characterizes our production process, makes Pasini products an authentic reflection of Italian culture.

PASINI
ITALIAN LUXURY HANDLES

our values

LOCALITÀ E GLOBALITÀ

La nostra azienda si trova esattamente nel mezzo delle valli bresciane, nel distretto produttivo della lavorazione dei metalli. Le nostre maniglie sono tuttavia presenti in oltre 30 Paesi del mondo.

CREATIVITÀ

La nostra è un'impresa dinamica e questo ci permette di soddisfare appieno e prontamente i bisogni dei nostri clienti. I nostri ingegneri e designer lavorano a stretto contatto con te, per cogliere qualsiasi esigenza e attuarla.

LE NOSTRE RADICI

La nostra famiglia lavora nel settore dell'ottone da oltre 50 anni e da allora proponiamo da sempre soluzioni scaturite da un saldo connubio tra tradizione e innovazione.

RISPETTO PER L'AMBIENTE

La valle pedemontana che ospita la nostra produzione è per noi fonte di profonda ispirazione: vogliamo preservarla intatta, sia per i nostri figli che per la nostra comunità. Per questo siamo sempre alla ricerca di nuove soluzioni che rispettino l'ambiente e il territorio.

DISTINZIONE

Le certificazioni di cui sono dotati tutti i nostri prodotti, come il più recente Certilogo, garantiscono l'adesione ad alti standard di qualità rispondenti alle vigenti normative europee. Lungo il nostro percorso garantiamo una continua supervisione, dalla produzione alla lavorazione, assicurando così un'eccellente qualità ai nostri clienti.

DINAMISMO E ATTENZIONE AL CLIENTE

I nostri prodotti rispondono ad ogni esigenza, da maniglie e maniglioni di lusso di alta gamma a soluzioni più accessibili e di facile installazione, spaziando dallo stile più sofisticato a quello più sobrio, tra tradizione e innovazione.

LOCALITY E GLOBALITY

Our company is situated exactly in the middle of the Brescia valley, in the district of the metals working. However our door handles and accessories are present in more than 30 countries all over the world.

CREATIVITY

Our door handle company is very dynamic and this allow us to satisfy the need of our clients. Our engineers and designers work with you to understand every demand and need and realize it.

OUR ORIGINS

Our family works in the brass field for over 50 years and since then we always propose a production between tradition and innovation.

ENVIRONMENT RESPECT

The valley where we are sitated is a source of inspiration: we want to preserve it, for our children and for our community. It is for this reason that we are always looking for new enviromentally-friendly solutions.

CERTIFICATIONS

Our products are certified and reach the highest quality standard accordingly to the European law PrEn 1906:2007. We certify that our products are completely projected and manufactured in Italy. We guarantee a continuous supervision of all our productive process assuring our clients an excellent quality.

DINAMISM AND ATTENTION TO THE CLIENT

Our products suit every clients request, from the high line of luxury handles and pull handles to the easy to install solution, from the most sophisticated style to the more minimal one, between tradition and innovation.

Da sempre per le maniglie e i maniglioni che realizziamo alla Pasini utilizziamo ottone, un metallo nobile con una alta percentuale di rame, che è riconosciuto come il materiale antibatterico per eccellenza. Questo significa che le maniglie così realizzate producono una azione antibatterica molto efficace. Nel corso degli anni la ricerca effettuata sui materiali ha portato la Pasini a sviluppare prodotti con altri materiali antibatterici come ad esempio il Corian®, confermando la sensibilità della nostra azienda a questo tema. Quest'anno in collaborazione con i nostri designer abbiamo voluto fare un passo in più con due nuove collezioni di maniglie per porte e finestre, a tutti gli effetti antimicrobiche, poiché realizzate in rame puro al 100% (**Antimicrobial Copper Cu+**). Di fatto il rame è stato la prima (e finora l'unica) **superficie metallica antimicrobica approvata dall'EPA** (l'agenzia ambientale americana). Gli studi pubblicati dal Copper Alliance Institute indicano chiaramente che le qualità del rame riducono ed **eliminano fino al 99,9% dei batteri**, entro due ore dal contatto. In sintesi i valori aggiunti delle nostre maniglie Pasini con il marchio **Antimicrobial Copper Cu+**:

- **Efficacia:** La maniglie Pasini in ottone e rame hanno una azione antimicrobica più efficace rispetto alle maniglie in alluminio, zama e acciaio con verniciature a base di ioni di argento.
- **Sicurezza scientifica:** le prove scientifiche realizzate su superfici metalliche con almeno il 60% di rame, da diversi laboratori internazionali e verificate in modo indipendente e approvata dalla US Environmental Protection Agency (EPA), dimostrano la capacità del rame di uccidere in modo continuo batteri e virus, anche molto pericolosi, che causano infezioni.
- **Resistenza:** una forte azione antimicrobica che rimane invariata nel tempo e resta efficace in condizioni difficili, anche dopo ripetute abrasioni a secco e umide, contaminazioni, ossidazione naturale e lavorazioni meccaniche.
- **Ottone, Corian®, rame:** confermano la nostra azienda all'avanguardia nel settore delle maniglie antimicrobiche.

Since ever, at Pasini, we use brass material to create our handles and pull handles. Brass is a metal alloy with a high percentage of copper that is an antibacterial material par excellence, this means that our brass handles have an effective antibacterial action. Over the years, Pasini did different researchs looking for new materials, developing handles with other antibacterial material as Corian®, confirming our company as sensitive to antibacterial research. This year, in collaboration with our designers, we did a further step certifying two new collections of handles produced in 100% copper with **Antimicrobial Copper Cu+**. This means that these handles are at all effects **antimicrobial handles**. In fact, copper is the first (and so far the only) **antimicrobial metal surface approved by the US EPA** (United States Environmental Protection Agency). Studies published by the Copper Alliance Institute clearly indicate that copper qualities **reduce and eliminate up to 99.9% of bacteria** within two hours of contact. Summary of added values of Pasini handles with the brand **Antimicrobial Copper Cu+**:

- **Efficacy:** The brass and copper Pasini handles have a more effective antimicrobial action than aluminum, zamak and steel handles with silver-ion based paints.
- **Scientific safety:** scientific tests carried out on metal surfaces with at least 60% copper, by several international laboratories approved by the US Environmental Protection Agency (EPA), demonstrate the ability of copper to kill bacteria and viruses, even very dangerous, that cause infections.
- **Resistance:** a strong antimicrobial action that remains unchanged over time and effective in difficult conditions, even after repeated dry and wet abrasions, contamination, natural oxidation and mechanical machining.
- **Brass, Corian®, copper:** confirm our company at the forefront in the field of antimicrobial handles.

Produciamo con responsabilità
riducendo gradualmente la nostra
impronta ecologica.

We produce with responsibility
gradually reducing our own ecological footprint.

PASINI
ITALIAN LUXURY HANDLES

eco-friendly

Reperti archeologici recenti, dicono che nella nostra valle si lavora il rame da oltre 4.000 anni e questo vuol dire che nelle nostre maniglie in ottone, una lega con almeno il 56% di rame, è presente un metallo antichissimo che può essere ancora riutilizzato.

APPROVVIGIONAMENTO DELLA MATERIA PRIMA

L'ottone, il materiale per eccellenza della produzione Pasini, è un metallo che a differenza di molti altri può essere riciclato all'infinito senza perdere le sue proprietà. Tutto il metallo ottone che utilizziamo per realizzare le nostre maniglie è prodotto con materiale proveniente da precedenti lavorazioni e manufatti. Inoltre la materia prima che riceviamo dai nostri fornitori è certificata con contenuto di piombo inferiore al 2%.

PROCESSO DI PRODUZIONE

Gli sfridi metallici che si creano durante le lavorazioni vengono rimessi nel ciclo produttivo per futuri riutilizzi. Tutti i rifiuti che escono dalla fabbrica vengono prima suddivisi, differenziati e poi consegnati a riciclatori industriali per futuri riutilizzi (pallet in legno, cartone, imballi di plastica). Dal 2012 il nostro stabilimento produttivo è dotato di un impianto fotovoltaico in grado di auto sostenere il fabbisogno energetico di buona parte della produzione. Da gennaio 2020 l'energia consumata è proveniente per la quasi totalità, da fonti rinnovabili, il che, unito all'energia venduta tramite l'impianto fotovoltaico, ci trasforma di fatto in un'azienda produttrice di energia rinnovabile.

PACKAGING E SERVIZIO DI SPEDIZIONE

Da sempre ottimizziamo la disposizione del prodotto sul pallet, in modo tale da ottenere un miglior rendimento grazie al maggior numero di colli collocabili. Per quanto riguarda il packaging delle nostre maniglie abbiamo incorporato nuovi imballaggi ecologici e riciclabili.

RIUTILIZZO E RICICLO

Le nostre maniglie, hanno una lunga durata di utilizzo e alla sua fine possono rientrare integralmente nel ciclo produttivo dei metalli. Tuttavia con il passare del tempo mantengono la loro eleganza trasformandosi in prestigiosi oggetti di antiquariato.

Recent archaeological finds, proves that copper has been worked in our valley for over 4,000 years. This means that in our brass handles, a metal alloy with at least 56% of copper, is present an ancient metal still recyclable nowadays.

SUPPLY OF RAW MATERIALS

Solid brass, the excellence material of the Pasini production, is a metal that, unlike many other materials, can be indefinitely recycled, without losing its properties. All brass we use to make our handles is produced with material coming from previous processes and artifacts. Furthermore raw material we receive from our suppliers is certified with a lead content of less than 2%.

PRODUCTION PROCESS

The metal scraps, that are created during processing, are put back into the production cycle for future reuse. All the waste that comes out of the factory is first divided, differentiated and delivered to industrial recyclers for future reuse (wooden pallets, cardboard, pallet packaging). Since 2012 our production plant has been equipped with a photovoltaic system able to self-sustain the energy needs of all production. From January 2020, the energy consumed is almost entirely from renewable sources, which, together with the energy sold through the photovoltaic system, transforms us into a renewable energy producer.

PACKAGING AND SHIPPING SERVICE

We have always optimized the arrangement of the product on the pallet, in order to obtain a higher yield thanks to the greater number of packages that can be placed. As for the packaging of our handles we have incorporated new eco-friendly and recyclable packaging.

REUSE AND RECYCLING

Our door handles have a long lasting, but at the end of their life, they can be fully integrated in a new metals production cycle. However with the passing of time they maintain their elegance becoming a prestigious antiquity.

Assicurati dell'autenticità delle maniglie Pasini

[Authenticate PFS Pasini handles](#)

Pasini è la prima maniglieria al mondo a certificare l'originalità dei propri prodotti grazie alla collaborazione con Certilogo, azienda specializzata nell'anticontraffazione, utilizzata dai marchi di moda più prestigiosi al mondo. Attualmente più di 50 marchi si servono di questa certificazione, per garantire a più di un milione di clienti l'originalità dei propri prodotti e combattere la contraffazione.

Grazie al sigillo di sicurezza Certilogo, ogni singolo pezzo viene marchiato e tracciato, creando una vera e propria carta d'identità del prodotto.

Per accertarsi che il prodotto acquistato sia un originale prodotto di PFS Pasini, è sufficiente seguire due semplici passaggi:

- Cerca sui nostri prodotti il marchio Certilogo con il Codice CLG a 12 cifre;
- Esegui una scansione del codice QR attraverso l'app del tuo smartphone, oppure visita il sito di Certilogo e inserisci il Codice associato al prodotto.

[Pasini is the first door handle company worldwide to certify the authenticity of its products, thanks to a partnership with CERTILOGO, specialized company employed by the most prestigious brand in the world. Nowadays more than 50 brands use this certification, to ensure their customers the authenticity of their products and help fight counterfeits.](#)

[Thanks to a secure seal, every single piece of our production is marked and tracked, creating a real Identity card of the product.](#)

[To fully assure that the article you purchased is an authentic PFS Pasini product, it is enough to follow these steps:](#)

- [Look for the Certilogo tag on our products with the CGL code of 12 numbers;](#)
- [Scan the QR code with your smartphone or visit the Certilogo web site and enter the code associate to the product.](#)

finishing & materials

LE NOSTRE FINITURE METTONO IN EVIDENZA TUTTA LA BELLEZZA DELL'OTTONE.

Grazie allo speciale strato protettivo trasparente, i colori si mantengono intatti nel tempo, garantendo alla tua maniglia la stessa lucentezza del prodotto nuovo. Per gli amanti del lusso, i prodotti della linea Pasini Jewels presentano finiture in oro, argento e altri materiali preziosi, oltre a particolari inserti in madreperla e cristalli. La vasta disponibilità di pregiati intarsi offre una concreta possibilità di personalizzare le maniglie secondo i più esigenti gusti estetici.

OUR FINISHES HIGHLIGHT ALL THE BEAUTY OF THE BRASS.

Thanks to a special transparent protective layer, our finishes maintain their properties over time, guaranteeing your handles the same brightness of the new product. For the luxury lovers, the products of the Pasini Jewels line have gold, silver finishes and precious materials, among them you can find mother of pearl inserts and crystals. The wide choice of specials inserts offer the possibility to customize our door handles and pull handle satisfying also the most demanding taste.

PASINI
ITALIAN LUXURY HANDLES

Pasini Custom Made

Realizzazione di maniglie e
maniglioni personalizzati
Il tuo cuore, la tua idea, le nostre
mani: per realizzare la tua opera
d'arte unica e irripetibile.

Realization of customized door handle and pull
handles and accessories. Your heart, your idea, our
hands to realize your unique masterpiece.

IL TUO SOGNO

Raccontaci il tuo desiderio, la tua idea, lo stile ed i materiali da utilizzare. Insieme creiamo una bozza. Basta l'indicazione sui materiali da utilizzare e sullo stile con cui vuoi che venga realizzata la maniglia. Noi pensiamo al resto.

DESIGN

La tua idea viene passata al vaglio dei nostri ingegneri e designer che, attraverso uno studio meticoloso, la adattano sia nel design che nella realizzazione. La fase di progettazione è lo step fondamentale, in cui avviene la preparazione di tutte le fasi successive della lavorazione. È in questo preciso punto che la maniglia che prima era semplicemente un desiderio recondito, ora inizia concretamente a prendere forma.

PROTOTIPO

Tramite una stampante 3D o direttamente realizzato a mano in creta dal nostro scultore, viene creato un prototipo della maniglia o del maniglione desiderato. A seguire, il progetto ti viene inviato per accertare la piena realizzazione della tua idea.

CONCRETEZZA DEL PRODOTTO

Ora che il prototipo è stato ultimato, i nostri designer realizzano il disegno definitivo della tua idea che sarà poi seguito nel minimo dettaglio durante la produzione.

LA TUA CREAZIONE

È l'ultimissima fase che dona realtà alla tua idea ed esaudisce definitivamente il tuo desiderio.

YOUR DREAM

Tell us your desire, your idea, the style and the materials to use, together we create a preliminary draft, it is enough to tell us which material you want to use and the style you prefer. We take care of the rest.

DESIGN

Our idea is carefully examined from our engineers and designer that make it became possible. The design phase is the most important step, where all the entire process is planned. It is at this stage that what it was only a dream comes to life.

PROTOTYPE

Thanks to a 3-D printer or handmade in clay from our sculptor, we realize a prototype of your desire object.

THE PRODUCT

Once the prototype is ready, our designer optimized the final drawing of your idea that will be followed in every details during the production phase.

YOUR CREATION

This is the latest phase, that makes your dream comes true.

DESIGN AND CONCEPT
Arch. **Andrea Frisullo**

Model E-QUALITY un nuovo concetto di maniglia basato sull'uguaglianza. Molteplici impugnature pensate per esigenze diverse: Disabile - Donna - Uomo - Bambino. L'architettura del cerchio rappresenta il concetto di uguaglianza - E-QUALITY: Design, ornamento e funzionalità.

Model E-QUALITY a new concept of door handle based on equal rights.
Multiple handling created for different needs:
Disabled – Woman – Man - Child
The architecture of the circle,
represent the concept of equality. E-QUALITY,
design, adornment, functionality.

Pasini Jewels
Maniglie di lusso per
interni ed esterni.
Maniglie da
batticuore.

Pasini Jewels
Luxury door handles
for indoor and outdoor.
Breathtaking handles.

Pasini Jewels

Il lusso più autentico si caratterizza per la sua capacità di diventare un classico e di adattarsi ad ogni epoca. Le maniglie e i maniglioni di questa linea regalano ai tuoi ambienti di lusso un fascino sofisticato. La tecnologia e la qualità di queste maniglie ci permettono di rappresentare l'artigianato Made in Italy in tutto il suo splendore: la linea Pasini Jewels è infatti una perfetta fusione fra la creatività dei nostri designer e la manualità dei maestri orafi, padroni assoluti delle tecniche pavé, stone e prestige. Un design tutto italiano che crea un valore speciale per i gioielli della tua casa.

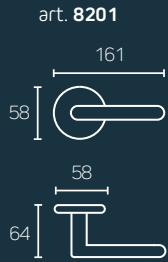

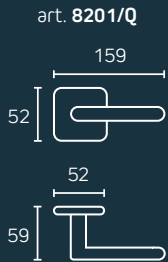

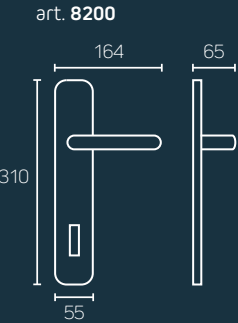

The most authentic luxury is characterized for its ability to become a classic and to be timeless. The door handles and the pull handles of this line offer to your luxury home a sophisticated charm. The technology and the quality of these handles allowed us to celebrate the real Made in Italy craftsmanship: Pasini Jewels line is, as a matter of fact, a perfect fusion between the creativity of our designers and the ability of our artisans, master of the pavé, stone and prestige techniques. An Italian creation that brings a special value to your home new masterpiece.

Pasini Design
La seduzione tra
tradizione e
modernità.

Pasini Design
The seduction between
tradition and
innovation.

Pasini Design

La seduzione è un'arte e le nostre maniglie della linea Pasini Design sono perfettamente in grado di colpire nel segno: lo stile e le linee raffinate di questa collezione stimolano ogni tuo desiderio più recondito, lo portano alla luce e ti permettono di toccarlo con mano. Attraverso un sapiente utilizzo di materiali diversi, queste maniglie affascinano e incantano: se la semplice vista ti tenta, il tatto ti ammalia completamente.

The seduction is an art and the handles of our Pasini Design line hit the highest point: the style and the elegant lines of this collection excite your secret dreams and allow you to see them with your own eyes. With a wise use of different materials, these handles charm and seduce you: if the only sight tempt you, the touch totally charm you.

Filo! DK e Filo! BK
sono un nuovo modo di
vedere ed utilizzare la
maniglia per finestra.

Rosetta Filo!

Window handle DK Filo!

Filo! Rose

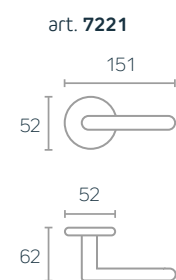

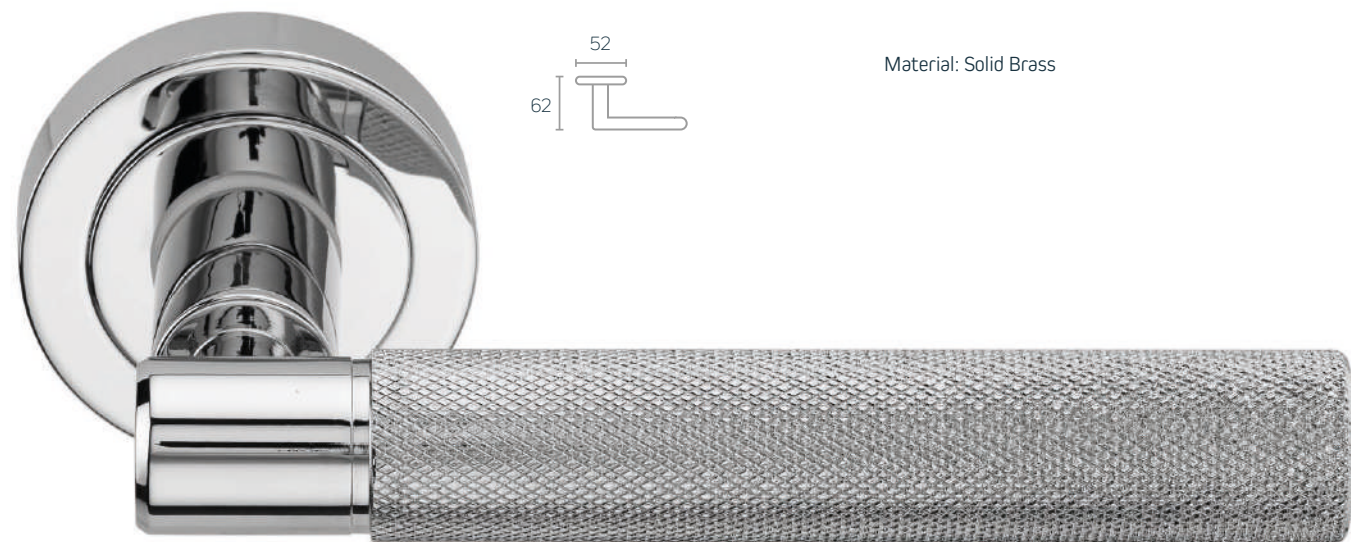

Questi due sistemi brevettati sono delle soluzioni tecnologiche ed innovative per il Dreh Kipp. Il nuovo design FILO riduce a soli 6mm lo spessore della rosetta, sia ovale che rettangolare ed è così in grado di donare alla maniglia un design moderno, accattivante e molto elegante. Il nuovo Sistema FILO! BK oltre ad avere la rosetta FILO, è dotato di un sistema di bloccaggio sempre in funzione. Questa rosetta brevettata, ha al suo interno un meccanismo di blocco automatico in ogni posizione, quando la finestra è chiusa o aperta, l'unico modo per sbloccarla è attraverso una levetta posizionata in basso. Si può sbloccare la maniglia solo utilizzando due mani, grazie a questo meccanismo, la maniglia è sempre bloccata, ed è inoltre una sicurezza in più per i piccoli di casa. Il sistema FILO!BK migliora la sicurezza delle tue finestre.

Realizzata da PFS Pasini, FILO!50 è un nuovo sistema brevettato di fissaggio per rosette, disponibile in disegno ovale e quadrato. FILO!50 è un sistema tecnologico e innovativo di fissaggio alla porta, completo di molla che riduce a soli 5 mm. lo spessore della rosetta e bocchetta. Tecnologia, design, funzionalità e innovazione nei soli 5mm. di FILO!50. Grazie al brevetto FILO!50 non saranno più necessari fori su misura per l'installazione della molla.

These two patented systems are an innovative and technological window handles fixing system. Their new technical design consent to reduce to only 6 mm the thickness of the oval or rectangular rosette giving your window handle a modern, slim and elegant design. The new system Filo! BK furthermore, is equipped with a block mechanism that is always activated. This patented system has a self block that works in every position, when the window is closed or open you can only unlock it thorough the lever. To unlock the window handle you always have to use two hands, in this way you are sure that the window is always blocked and it is an additional child safety system. The FILO! BK system improves the security of your windows.

Designed by PFS Pasini, FILO!50 is a new patented fixing system for roses, available in round or square design. FILO!50 is a technological and innovative door fixing system, complete with a spring that reduces to 5mm. the thickness of the rose and escutcheon. Technology, design, functionally and innovation in fust 5mm. of FILO!50. Thanks to FILO!50 there is no need of further drilling or milling on the door.

Pasini Essential
La semplicità della
carezza quotidiana.

Pasini Essential
The comfort of
your daily smile.

Pasini Essential

Hai un animo concreto, che ricerca la più pura semplicità delle cose. L'essenzialità è necessaria per tenerti con i piedi ben saldi a terra e sentirti soddisfatto. La linea Pasini Essential ti cattura per la sua naturalezza delle linee, ti affascina per la sua intelligente scelta dei materiali, per diventare parte insostituibile della tua quotidianità.

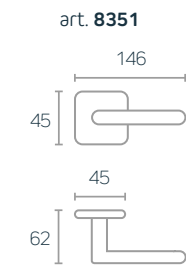

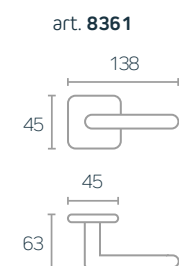

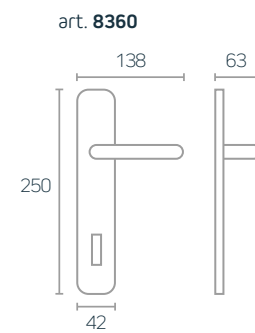

You have a skilled and concrete soul who search the pure reality of the things. The essentiality of our door hardware makes you feel more practical and satisfied. The Pasini Essential line catches you for its fluid lines, charms you for its smart choice of the materials and became an irreplaceable part of your everyday life.

Stainless Steel Test

Finitura in PVD Rivestimento metallico sottovuoto in zirconio denominato PVD (Physical Vapor Deposition). Incrementa notevolmente la resistenza all'usura e all'abrasione assicurando una più lunga durata del prodotto e il mantenimento di brillantezza e stabilità del colore nel tempo.

PVD Finishing Metallic zirconium vacuum coating named PVD (Physical Vapor Deposition) increases the resistance to wear, abrasion and rubbing action, granting a longer life, better brightness and colour stability to our products.

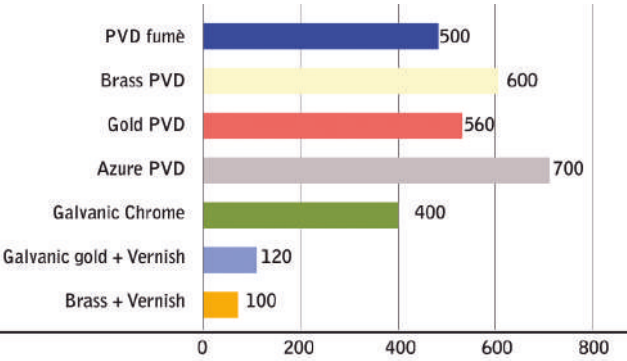

Consigli di manutenzione La pulizia ordinaria dei nostri accessori deve essere effettuata ogni 4-6 settimane utilizzando un panno morbido. Per la pulizia ed il mantenimento delle superfici in PVD suggeriamo utilizzo di un panno morbido inumidito con alcool.

Maintenance Tips The ordinary cleaning of our accessories must be effectuated every 4-6 weeks using a smooth cloth. For cleaning and maintenance of PVD surfaces we suggest you to use a smooth cloth with alcohol.

PVD Finish Test

Resistenza all'abrasione | La prova di sfregamento comparata è eseguita con detersivi comuni applicati su un panno strofinando sulla superficie metallica fino ad usura della stessa.

Rubbing Resistance | Comparative rubbing test made with common domestic usage detergent on a cloth which has been rubbed on metallic treated surface until spoiling it.

Pasini Metals Productions S.a.S. Condizioni generali di vendita

- Gli ordini diretti oppure assunti dai nostri agenti o rappresentanti sono subordinati alla nostra approvazione.
- I prezzi si intendono IVA esclusa e FRANCO FABBRICA.
- La merce viaggia sempre a rischio e pericolo del compratore anche se venduta franco destino. In mancanza di particolari accordi la spedizione verrà effettuata con mezzi a scelta della venditrice e senza responsabilità alcuna da parte di questa. Le eventuali assicurazioni concernenti i trasporti devono essere assunte dal compratore e gli oneri relativi saranno a carico dello stesso, salvo diversa pattuizione.
- Decorsi otto giorni dal ricevimento della merce, il compratore decadrà da qualsiasi diritto di reclamo per vizio o mancanza di qualità o di peso delle cose compravendute. In caso di tempestivo reclamo, le merci dovranno essere tenute integralmente a disposizione della venditrice per eventuali controlli; la compratrice non potrà farne uso o manometterle, neppure in minima parte, sotto pena di decadenza del diritto di reclamo. Ove la venditrice riconosca fondato il reclamo, la stessa non avrà altro obbligo che quello di sostituire le merci, le quali dovranno essere preventivamente restituite nell'originale stato di presentazione. Ogni ammanco od avaria saranno ad esclusivo carico del compratore. Le misure dei nostri articoli, espresse in millimetri, devono intendersi approssimative e pertanto la venditrice declina ogni responsabilità in ordine alla loro esattezza per eventuali contestazioni.
- Pagamento: Il pagamento delle fatture deve essere effettuato direttamente alla nostra sede in Sabbio Chiese, Via dei Montini 1 entro la scadenza stabilita. In caso di ritardato pagamento verranno applicati gli interessi di mora. La merce rimane di proprietà della Pasini Metals Productions S.a.S. fino al completo pagamento.
- Ci riserviamo il diritto di modificare le caratteristiche dei nostri articoli o di correggere eventuali difetti in ogni momento senza preavviso ai clienti.
- Per qualunque contestazione resta espressamente convenuta la competenza esclusiva del Foro di Brescia.
- Il committente, sottoscrivendo ordinazione, dichiara di conoscere ed accettare integralmente tutte le condizioni suesposte, come pure quelle manoscritte o dattiloscritte sul contratto.

Pasini Metals Productions S.a.S. General Sales Conditions

- All direct orders and those placed by our agents, are subject to our approval.

Prices are intended ex-works and V.A.T. excluded.
- Goods are forwarded at the buyer's own risk, even when the sale is carriage free. Unless otherwise stated, the means of transport for the forwarding will be chosen by the seller without any responsibility whatsoever on his part. Unless otherwise agreed, all possible insurance regarding transport must be contracted by the buyer and all expenses deriving from it will be at the buyer's own charge.
- Eight days after receipt of the goods, the buyer will decline every right to any claims for defects, shortcomings in quality or in weight of the object of the sale. In the event of claims promptly placed, the goods will have to be kept at the seller's complete disposal for any checks that may be required. The buyer is not entitled to make use of or tamper with these goods - not even slightly - as this may cause invalidation of any right of claims or complaints.
In the event of the seller recognizing the validity of the claim, he will be obliged to replace the goods, and these will have to be returned in their original state and condition. Any expenses deriving from damage (e.g. battering, denting, etc) found in the goods will be at the buyer's entire charge. In the event of any contention arising for possible inexactness in the measures of our items, which are expressed in millimetres, the seller declines every responsibility as these must be intended only as approximate.
- Payment: payment of invoices must be effected directly to our registered office in Sabbio Chiese, Via dei Montini, 1 within the established deadline. Delayed payments will involve the application of interests. Until payment has been effected in full, property of the goods will lie with Pasini Metals Productions S.a.S.
- We reserve the right to alter the features of our items or of correcting possible defects at any moment and without any prior notice.
- In case of contentions that might arise, it is expressly established that the competent authority is that of the Court of Brescia.
- By placing orders, the buyer declares that he knows and completely accepts all the above conditions as well as those handwritten or typed in the order(s).
